Testimonial: Jade Kearns

To whom it may concern

Jade Kearns has been reporting to me since 2015 when I was appointed in the role of Manager in the Support Solutions team. He started in the operations department as a Clinical Analyst and subsequently gained experience in various facets of the business, eventually ending up in a specialist position as a Medicine Information Analyst.

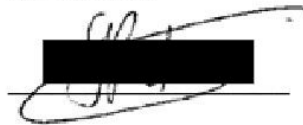

The position Jade currently holds is a unique one that requires insight into various business units such as Acute Medicine, Chronic Medicine, Oncology, aPMB, Scheme rules, Business Operations, IT, User Acceptance Testing etc.

Jade is an extremely hard working and dedicated individual, always willing to go the extra mile. His analytical skills are second to none. He has excellent inter-personal qualities which makes it a pleasure to work with. These include amongst others, his ability to work independently, problem solving skills, working under pressure without complaining, multi-tasking, being an excellent team player and always displaying a high degree of passion. He truly lives the values of our company.

The knowledge and experience he has acquired over the years makes him an irreplaceable asset to the company. Pursuing his IT studies in Application and Software Development, it's inevitable that Jade's qualification and skills set will have him move on to greater things. When this happens, it will leave a huge gap in the business but at the same time we would wish him the very best for the future.

Feel free to contact me if any further information required
