

Testimonial for Jade Kearns

I am currently the manager of the Bonitas Chronic Medicine Management team at Medscheme. In 2010, when I returned from maternity leave, in the role of supervisor to the Chronic Medicine Management team (of the Medscheme schemes), there had been some structural changes and new acquisitions during the 6 months that I was away. Upon my return, there were quite a few new employees who had become part of the team.

Jade Kearns was one of the new staff who joined. It was part of my objective to get to know the team, including what their strengths and areas of development are. It quickly became evident that Jade was a key player as part of the team - the team that Jade was part of fielded calls from Healthcare Providers to register and update chronic medicine requests for patients of the various Medical Aids. Some of these calls could become quite challenging, as Providers query the decline of medication, and challenge the funding policies. It was the duty of the call centre staff to handle these queries according to the scheme criteria, while taking into account the information pertaining to each individual case, as each case is unique. Clinical staff were on hand to assist and assess cases where required. Jade was driven and motivated in his work. He dealt with the queries in a calm and efficient manner, and used the guidelines and tools he had at hand to fully respond to each scenario in the appropriate manner. He had a discerning eye - where further information or clinical intervention was required that could assist with review of a case, or to prevent an unnecessary escalation, he was able to ask the correct questions and steer the queries in the right direction. This is where Jade proved to be a team player, and displayed the ability to exercise the values of the company, which included integrity, accountability, and going the extra mile to make a positive difference in servicing our members.

Jade was a team player, but could also work well independently. He had sound knowledge of technical aspects, and was quite creative due to his background in graphic design. When the need arose to second a team member to assist with a project that required knowledge of our product, together with system knowledge to create enhancements that would benefit us, Jade was the obvious choice. Not only was he astute, we also knew he would enjoy the new challenge - he was destined to do more in this company, and while we would hate to lose him as part of the team, we wanted to assist him to grow and progress to bigger and better things.

Not too long after the project concluded, Jade was successful in a new position within the company. Jade's contribution and aptitude no doubt played a big role in this decision. While he was reporting to me, he proved to be a great asset to the team. He was professional, yet funny and light-hearted at the same time. He was well-liked within the team, and assisted his colleagues wherever he could. He responded to problems without getting angry or frustrated, and was also able to accept constructive criticism and use it to improve himself, rather than view it as a personal attack.

In view of his exemplary attitude and aptitude, Jade has my highest recommendation. He would be an asset to any team. I wish him all the very best in all he does and hopes to achieve.
